

# SA4W waterproof safety light curtain

## Dimensions

A1: Upper end cap  
 A2: lower end cap + aviation terminal  
 B1: Upper Blind Spot B2: Lower Blind Spot  
 D: Optical axis spacing  
 H: grating protection height  
 L: total grating height

A1=21mm  
 A2=49mm  
 B1=1/2 optical axis spacing  
 B2=1/2 optical axis spacing+27mm  
 H=(Number of optical axes-1)\*Optical axis spacing  
 L=number of optical axes\*spacing between optical axes+97mm (including 33mm aviation terminals)

## Selection rules

- \* Domestic first IP69 waterproof and dustproof safety grating
- \*The deepest can be immersed in water up to 10 meters for normal use
- \*Anti-electromagnetic, light interference passed CE/FCC certification
- \* Internal self-test, LED indicator and fault light
- \*The default outlet is 2 meters, with metal waterproof aviation plug
